## PROJECTS

<b>Text to Image Comparator : Text2Visual</b> Dec 2023 - Feb 2024 A user-friendly interface developed with React.js, enabling easy text input and image uploading for users. The application analyzes the loading speeds of the chosen APIs, presenting users with clear, comparative data and visualizations to evaluate API performance.  Text2Visual is engineered to compare various text-to-image APIs, such as OpenAI and OpenJourney, enabling users to evaluate and contrast their performance in real time.  Text2Visual is specifically tailored to assess and compare different APIs that convert text to images, aiding in the selection of the most efficient and accurate API for this purpose.	<b>Skill Factory</b> Feb 2023 - May 2023 Developed and maintained "Skill Factory", a dynamic platform connecting skilled professionals including carpenters, plumbers, and electricians with individuals in need of their services.  Utilized HTML, CSS, JavaScript, SQL, and Python to create an intuitive interface facilitating seamless communication and efficient service delivery.  Streamlined the process of hiring skilled workers, resulting in increased accessibility and customer satisfaction.
